Display A Picture From Database

Theres what i want to do:

I have a datagridview and when i click there it opens another form with the information that is inside the datagridview.

Print there

What i want to do is, in my ACCESS database i have OLE Object with a picture (bitmap) and i want to display that in the form "info" too.

This is the code that i have to get the info when i click in the datagridview:

```vbnet
Private Sub DataGridView1_RowHeaderMouseClick(ByVal sender As Object, ByVal e As
System.Windows.Forms.DataGridViewCellMouseEventArgs) Handles
DataGridView1.RowHeaderMouseClick

Dim curForm As Form = New Form
With curForm
info.TextBox1.Text = DataGridView1.SelectedRows(0).Cells(1).Value
info.TextBox2.Text = DataGridView1.SelectedRows(0).Cells(2).Value
info.TextBox3.Text = DataGridView1.SelectedRows(0).Cells(3).Value
info.TextBox4.Text = DataGridView1.SelectedRows(0).Cells(4).Value
info.TextBox5.Text = DataGridView1.SelectedRows(0).Cells(5).Value

info.Show()
End With

End Sub
```

If you need some another info just ask! I really appreciate help! Thank you

vb.net   ms-access   datagridview
